Custom STS Metadata File Editor Keygen Full Version

Custom STS Metadata File Editor is an easy-to-use tool that gives you the possibility to edit federation metadata for Security Token Services (STS). This focuses on contact details, claims, active and passive endpoints, along with certificates. Prerequisites and interface The program's not wrapped in a setup kit, so you can drop the downloaded files in a custom location on the HDD and simply click the.exe to launch Custom STS Metadata File Editor. Another option is to keep it stored on a removable storage device, in order to run it on any PC. Just keep in mind that you must have.NET Framework installed. It doesn't add new entries to the Windows registry or create other files on the hard drive without asking for your confirmation. The interface is user-friendly, made from a large window with a standard.NET Framework form that doesn't put emphasis on graphical elements, yet it's quite easy to navigate. Edit and save STS metadata After indicating the metadata file's location via the file browser, you can enter the service name and edit contact information when it comes to the person's name, surname, company, type, email address and phone number, along with organization name, display name and URL. Claims can be displayed for any selected type. Moreover, it's possible to modify the active and passive endpoint links, as well as to customize certificate data. For instance, you can set the selected STS signing certificate, current and original thumbprint, together with copied thumbprint details. All metadata can be saved with one click. Evaluation and conclusion We haven't encountered any stability issues in our tests, thanks to the fact that the utility didn't freeze, crash or prompt errors. It used a low amount of CPU and RAM. No recent updates have been made, unfortunately. Nevertheless, you can test Custom STS Metadata File Editor for yourself.Former Vice President Joe Biden on Thursday denied speculation that he's gearing up for a presidential run in 2020. "Never said I was running for president," Biden said Thursday in an interview with MSNBC's "The Rachel Maddow Show." ADVERTISEMENT The former vice president told Maddow that he has been "exploring" the presidency in recent months. "Look, I'm the guy who, on the very night that I got into the race, [when] I did the first Democratic debate, I went out and was saying, 'I'm not going to do a

What's New In Custom STS Metadata File Editor?

STS (Security Token Service) is a Windows component used to allow user authentication from a browser. You can check the official website for more information.
